Automate The Test URL and Check Amount Header Value Is Sorted

or Not (Cover all the functionality before going to Home Page).

App URL - https://sakshingp.github.io/assignment/login.html

Eligible Testing Frameworks
- Selenium Web Driver
- Cypress
- Playwrigth
- Protractor

Eligible programming languages
- Java
- JavaScript
- Python

Tests
You need to write the automation scripts for the following pages:

Login Page
Cover all the possible functional testing scenarios.
Note:- Any value of username/password is valid to log in the application

Home Page
After successful login into the application, click the AMOUNT header in the transaction table and check the values are sorted.

How to score better:
- Use of framework or oops concept
- Use of assertions.
- Good coverage of test cases.
- Html reporting - good to have.
